Profile

A determined and driven full-stack developer with a strong foundation in software development and programming principles.

Well versed in following Agile workflow and keeping to a clean and precise Test Driven Development process.

An excellent team-member with previous experience working to strict client specifications and meeting deadlines as required.

Featured Projects

HEYDAY - <https://github.com/RPGrimes/heyday>

This application helps to organise a meetup of friends by choosing a date for them based on the whole group's availability and preferences, all while maintaining individuals' privacy and not storing any user data.

Tech stack:

- React JS
- Express JS
- SCSS
- Hosted using Vercel (frontend) and Heroku (backend)
- Github

ACEBOOK - <https://github.com/RPGrimes/acebook>

A social media site inspired by Facebook. Users are able to post both messages and images to a newsfeed, in addition to be able to like and comment on individual posts.

Tech stack:

- Ruby on Rails
- PostgreSQL
- Bootstrap CSS
- Github

Employment History

CARD GEOTECHNICS LIMITED (CGL)

Senior Engineer - June 2019 to August 2021

Engineer - September 2016 to June 2019

- Management and supervision of projects throughout London and southern England
- Client liaison for a number of major clients and responsible for company relationship building with a range of clients from a range of different disciplines
- Formal mentor for both graduate and junior engineers
- Reviewing and producing reports for clients consistently on time and on-budget
- Working between several teams (both internal and external to CGL) in a collaborative manner throughout the course of a project lifetime.
